Malaria Ecology and Climate Change

The Great Hall at International House, UC San Diego
Monday, May 23 at 12:00pm

Speaker:
Dr. Gordon McCord, Assistant Professor,
School of Global Policy and Strategy

This talk will introduce the role of climate change in the spread of vector-borne diseases, specifically malaria. The goal of this series is to inspire cross-disciplinary discussions in the area of climate and health.

Lunch provided for all attendees.
